

## **LogicAll Solutions LLC**

**Joins the Western Dredging Organization (WEDA)**

**Press Release – April 23, 2010**

LogicAll Solutions (LAS) announces its new membership to the Western Dredging Association (WEDA) headquartered in Vancouver, WA under the Direction of Lawrence M. Patella. The WEDA encompasses North, Central and South America, and is one of the three organizations that form the World Dredging Association known as the WODA. As providers of surface mining monitoring solutions for the past decade, LogicAll Solutions' expansive "Global Ready" family of TerraRover products includes dredging solutions.

David Hoskins, the President of LAS says, "Our introduction into the WEDA offers LogicAll Solutions the opportunity to inform the industry of new and innovative approaches to safety, geo-fencing, increased production, and permitting compliance emphasized by the dredging industry. As a new member, LogicAll Solutions will engage with the WEDA and contribute to the engineering advancements in the Dredging Industry. We look forward to our membership and the engineering challenges which face today's dredging companies."

**About LogicAll Solutions** – Based in Bradenton Florida, LAS provides a family of products and systems which leverage GPS technology and are primarily utilized by the mining industry. These TerraRover monitoring products are designed to improve vehicle efficiency to include safety monitoring, geo-fencing, data logging, production reports and other permitting compliance data. They are ideal for use on dragline cranes, barges, booms, dredges, drill rigs and other industrial oriented off-road heavy equipment. Additional information can be found at [www.logicallsolutions.net](http://www.logicallsolutions.net).
